Acknowledgement

In 2002 my colleague Kevin Dilton-Hill, who is managing partner of the Bubble Group in the UK, was asked to develop a course on Rolling Forecasts for the Institute for International Research. Kevin invited me to participate in the project. Since then , we’ve presented the IIR rolling forecast workshop three or four times each year in London, and have run in-house workshops on this topic in countries as far apart as Malawi, Singapore, Bahrain and South Africa. Without Kevin’s input, ideas and discussion this book would never have been written.

However any errors, omissions, incorrect statements, and things you just don't agree with, are the sole responsibility of the author.
